

Anshuman Sarkar

AI/ML Engineer & Full-Stack MERN Developer

anshumansarkar700@gmail.com | [+91 7047586637](tel:+917047586637) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI/ML and Full-Stack Developer pursuing M.Sc. in Computer Science with experience in GenAI applications, RAG pipelines, LangChain, LangGraph, and MERN stack development. Skilled in building scalable AI-powered applications, REST APIs, and modern web platforms using Python, JavaScript, React.js, Node.js, and vector databases. Passionate about software engineering, LLM systems, and intelligent automation.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, JavaScript, SQL

AI/ML & GenAI: LLMs, RAG, LangChain, LangGraph, NLP, Deep Learning, Prompt Engineering, Hugging Face, ChromaDB, Pinecone, Vector Databases, Transformers, FastAPI, Pydantic

Web Development: React.js, Next.js, Node.js, Express.js, REST APIs, Tailwind CSS, HTML5/CSS3, WebSockets

Databases & Cloud: MongoDB, MySQL, Docker, AWS, Vercel, Render, CI/CD

Tools & Platforms: Git/GitHub, Postman, VS Code, Jupyter

EXPERIENCE

AI Full Stack Developer

2026 – Present

Andreal, Kolkata (On-site)

- Automated PDF-to-webpage conversion using Python, cutting turnaround time from 10 days to under 1 day (90% faster).
- Built a Zoho CRM automation pipeline to fetch large-scale data from Zoho CRM and trigger automatic, context-based email dispatch for company operations.
- Maintained government client project EEPIC India with AI-assisted development workflows, ensuring 99% uptime.

Web Developer Intern

Sep 2024

Prodigy InfoTech, Mumbai (Remote)

- Built reusable React.js + Node.js component library used across 5 web applications, cutting feature development time by 30% and reducing UI bug rate by 20%.
- Developed and integrated 8+ RESTful APIs with Express.js and MongoDB, handling user auth, data CRUD.

PROJECTS

RepoMind | AI-Powered Repository Intelligence Platform | [GitHub](#)

- Technologies:** Python, LLM, LangChain, LangGraph, RAG, ChromaDB, Next.js, MongoDB
- Engineered a RAG + LangGraph agent platform for semantic code search, automated review, and bug detection — reducing manual review effort by 45% across repositories with 1,000+ files.
- Built multilingual ChromaDB pipelines achieving sub-second query latency and 60% faster resolution compared to keyword search.

Quantum Cryptanalysis Lab | RSA Security Simulation | [GitHub](#) | [Live](#)

- Technologies:** React.js, Node.js, Python, Qiskit
- Designed a quantum cryptography simulation platform demonstrating RSA vulnerabilities using Shor's Algorithm and Qiskit.
- Deployed React.js frontend on Vercel and Node.js + Python API on Render with CI/CD pipeline; supporting 3 modular attack simulations.

AutoParkIQ | Machine Learning-Based Smart Parking System | [GitHub](#)

- Technologies:** React.js, Node.js, MongoDB, Python, Machine Learning
- Trained and deployed an ML model (CNN) achieving 88% prediction accuracy for real-time parking availability.
- Built full-stack platform with React.js, Node.js, MongoDB, and Python ML pipeline; integrated REST API serving predictions with less than 200ms latency.

EDUCATION

M.Sc. in Computer Science | University of Calcutta | 2024–2026

B.Sc. in Computer Science | Asutosh College, University of Calcutta | 2021–2024

ACHIEVEMENTS

WB JECA 2025 | *Rank 121*

3rd Position | *ICDMAI Hackathon 2025, Kolkata*

- Built ML-based predictive analytics solutions for customer attrition prevention.

Quantum in Biology Workshop | *Ramakrishna Mission Vidyamandira*

- Completed workshop on quantum mechanics applications in biological systems.
